

neodisher® ProTech 8

Mildly alkaline cleaning agent in powder form
for use in special washing machines

Main fields of application:	Mechanical cleaning of soldering frames in the electronics industry.
Characteristics:	<p>neodisher ProTech 8 has a mildly alkaline formulation, and it removes soldering pastes and colophony. In addition to its good cleaning action, neodisher ProTech 8 not only has anti-foam properties but also a good ability to reduce hardness. neodisher ProTech 8 is free from silicon compounds.</p> <p>neodisher ProTech 8 has a very high level of material protection, and it is suitable for cleaning surfaces made of stainless steel, aluminium, ceramics, glass and alkali-resistant plastics.</p>
Application and dosage:	<p>In special washing machines: 5 - 8 g/l using suitable dosing devices or added manually.</p> <p>Notes: <u>Circuit board industry</u> To remove rosin and solder paste soldering frames are rinsed with aqueous working solutions of neodisher ProTech8 (5 - 8 g/l) at temperatures of 60 - 80 °C. For this, the use of softened or deionised water is recommended. Subsequently the neodisher ProTech 8-solution has to be rinsed out completely by sufficient rinsing. Do not mix with other products.</p>
Technical data:	<p>Bulk density: 805 - 855 g/l pH-range (determined in deionised water, 20 °C) 5 - 8 g/l: 11.8 - 12.4 Titration factor: 0.37 (in accordance with neodisher titration method)</p>
Ingredients:	<p>I Ingredients according to Regulation (EC) No 648/2004 on detergents: 5 - 15 % non-ionic surfactants > 30 % phosphates</p>
Storage information:	Keep the container tightly closed. The product is sensitive to moisture.
Hazard and precautionary statements:	<p>For safety information see EC safety data sheets. These are available at www.drweigert.com under the category "Download".</p> <p>Dispose only when container is empty and closed. For disposal of product residues, refer to the Material Safety Data Sheet.</p>
